

Poly Square Calf Nursery

Standard Features:

- White opaque material to knock out sun heat
- Made from high-impact UV stabilized polyethylene.
- 5' Wide x 6'6" long
- Weighs approximately 100 pounds
- Stackable
- Easy cleaning
- Easy access bottle holder
- Bucket holder with 2 - 5-quart buckets
- Fence brackets
- Center flow adjustable vent

Big Foot Calf Nursery

Standard Features:

- White opaque material to knock out sun heat
- Made from high-impact UV stabilized polyethylene..
- 5' Wide x 7'6" long
- Weighs approx. 130 pounds
- Stackable
- Easy cleaning
- Easy access bottle holder
- Bucket holder with 2 - 5-quart buckets
- Fence brackets
- Rear vent
- Center flow adjustable vent

At last, a square hutch wide enough and long enough for a calf to lay in the center, away from the cold radiation of the walls.

The Poly Square has no rivets to break, no cracks to let snow and rain sift in, and needs no steel rim around the bottom for strength (*imagine how hard this is to clean*). The Poly Square comes standard with the feed station on the left side, but can be ordered with the feed station on the right side or on the rear.

Today's Calves Are Tomorrow's Profits

The Poly Square now comes with a taller front door, a larger feed door, and now a hay feeder can be added as an option.

The Poly Square has inverted ribs for better wind resistance, a wider stance (5') for better stability. It also has the Center Roof Vent, the leading vent system on the market today. As stated in an article by Peter Leonard from Vermont Technical Institute . . . "The point that seems to

differentiate these hutches from others on the market is the rotatable air vent at the peak." The Poly Square and the Poly Big Foot come standard with fence brackets, but they can also be used with a chain and collar.

Note, that the standard features of the Poly Square are extras on most other calf hutches on the market today.

station on the left side, but can be ordered with the feed station on the right side or on the rear.

Options

Feed Station

Rear Vent

Hay Feeder

PolyDome Pails and Feed Buckets

Fence Feeder

Rear Feeder

Poly Square Big Foot

The Big Foot has all the features of the Poly Square, but it is 12" longer (7'6"), and comes standard with the rear vent system.

The Big Foot will give you superb growth and healthier lung power needed for proper development into higher producing herds.

NOTE: Left side feed standard. Right side, and rear feed configurations available.

As stated in *Country Folks*, May 8, 1989 by Dr. Howard Larsen, Professor Emeritus Dairy Science Department, University of Wisconsin - "Properly designed, the calf hutch can be an excellent management tool which allows the calf to be comfortable, disease free, and grow to her genetic capacity. Calves will then thrive, not merely survive, and become long-lived, healthy productive animals in the herd."

The Poly Square Big Foot is constructed of opaque material to eliminate the solar effect. It blocks out the sun's heat—not sunlight. The Big Foot's inverted ribs and 5'(w)x7'6"(l) stance make it extremely wind resistant—with the largest footprint of any unit on the market today. And like the Poly Square it has no pop rivets which means no breaks or cracks for snow and rain to sift in.

The Poly Square Big Foot has the biggest sleeping area of any calf hutch on the market today (38 square feet).
