

# PolyDome Warm Climate

## Standard Features:

- Made from high-impact, UV stabilized polyethylene
- 44" wide x 60" long x 48" high
- Fence Brackets
- Easy access bottle holder
- Inside bucket holder with two 5-quart buckets
- Large Rear Vent Window
- Easy cleaning

PolyDome introduces the Warm Climate Hut. These shelters are super ventilated for comfort in the warmest environments. The Warm Climate Hut comes standard with a large hinged rear vent window which opens up nearly one third of the back wall for superior ventilation. The top features a sliding cover over 8 vent openings.

The PolyDome Warm Climate Hut is made from UV stabilized polyethylene, so it is strong, durable, and easily cleaned. It

can be made from opaque material to reflect the sun, or natural material to absorb the sun's rays to help heat and dry the unit. These units come with a front bottle holder (bottle not included) for easy access; and an inside bucket holder with two 5-quart buckets.

The Warm Climate Hut assembles easily, to make a 44" wide x 60" long x 48" high shelter. It's totally free-standing, so you can move it anywhere—no foundation is required.

*Large rear window opens for ventilation*
