

Electra-Mix

Some testimonials from several of our many satisfied Electra-Mix customers...

We really like our Electra-Mix mixer. The cows perform better since we can cut and mix dry hay in the mixer. Milk production went up 1.5 to 2 lbs on average. Butterfat went up to 3.65. Thank you for a good mixer!
Mifflinburg, PA, milking 48 cows

We use two Electra-Mix mixers. They do an excellent job of processing baleage and mixing TMR for us. Herd health has been excellent on both farms, allowing internal herd growth and heifer sales. The hay knives require occasional sharpening and replacement, other maintenance has been minimal. The folks at I. H. Rissler Mfg. have been good to work with.
Lebanon, PA, 2 farms, milking 125 and 60 cows

We are very happy with our mixer. The gentle tumble mixing does not chew the feed into tiny bits. Mixing time is less than I have ever seen. Ever since we started using our Electra-Mix (no knives installed) we have higher butterfat because of the feed being more coarse.
Ephrata, PA, milking 36 cows

We like our new Rissler Electra-Mix. It grinds hay and baleage no problem, no more making haylage! It runs quiet, is easy to operate, and makes a nice mix.
Rochester, IN, milking 60 cows

We like our Electra-Mix because we can put plenty of dry hay in our ration and not use a bedding chopper to chop hay. We also have better milk components, less vet bills, and better herd health.
Plymouth, OH, milking 25 cows

We are very pleased with our I. H. Rissler Electra-Mix. We are impressed with how heavy duty it is built, the unloading speed, and how it cuts and mixes the dry hay. It has met all our expectations and we feel the price was reasonable compared to other mixers.
Penn Yan, NY, milking 40 cows

I am pleased with my Electra-Mix. It is a very quiet mixer while running compared to some others. It mixes consistently, and unloads evenly with low power requirements. I like the mixer's heavy duty construction.
Danville, PA, milking 80 cows
